

AIRBUS®

A FREE programme for secondary school teachers/FE lecturers of Sciences, Technology, Engineering & Mathematics (STEM) and teachers with careers coordinator responsibilities

Technology in Action *with* Airbus

Venue: Airbus UK - Filton, Bristol

Date: Thursday 22nd April 2010

On this occasion Careers Wales West, in partnership with Engineering UK, are able to pay supply cover costs for all secondary school teachers attending.

This one day FREE programme will provide you with the opportunity to:

- Obtain useful information on the engineering sector from an Engineering UK Ambassador, as well as expert information provided on academic routes, qualifications and pathways for pupils into engineering careers at all skill levels (including Learning Pathways and Welsh Baccalaureate Qualifications).
- Gain an insight into engineering, technological, research & development work of Airbus UK, and learn about Airbus' history as a world-leader in the manufacture of commercial and military aircraft.
- Learn about the different paths of careers progression undertaken by Airbus engineering employees.
- Explore the considerations and concepts involved in the production of Airbus components, visiting the Airbus A380 Landing Gear Rig section and also the Airbus A400M Wing Assembly Line.
- Appreciate the technological innovations utilised in the supersonic flight era by visiting a decommissioned Concorde aircraft, permanently housed at Airbus' Filton premises.
